

## OBJECTIVES

### Sustainable Utilisation of Natural Resources

We will manage and allocate our natural resources in efficient and environmentally sustainable manner.

### Water Security

We will be a water efficient and water secure nation.

### Energy Security

Botswana will be energy secure, with diversified safe and clean energy sources, and a net energy exporter.

### Ecosystem Functions and services

Botswana will have healthy ecosystems that support the economy livelihoods and our cultural heritage as well as well enhance resilience to climate change.

### Sustainable Human Settlements

Our cities, towns and villages will be safe and clean, providing decent and affordable housing and economic opportunities for all.

### Sustainable Land Use and Management

Our land management system will be transformed to optionally balance all land uses.

### Climate Resilience and Disaster Risk Reduction

Botswana will have a low carbon footprint, with a society that is aware of and resilient to the consequences of climate change.

### Pollution and Waste

Botswana will be a clean country with solid waste viewed as a resource and its economic value integrated in natural resource planning and management.

## PILLAR: 3 SUSTAINABLE ENVIROMENT
